ROMOLD

When it comes to chambers

ROMOLD Domestic Pump Station RPC-80-1

WHY PRESSURE DRAINAGE?

Wastewater can not always flow to the sewer due to the gravity. This solution would be often associated with high costs and additional construction. In such cases, the pressure drainage is your economical solution.

THE BASIS: ROMOLD PUMP STATION

The ROMOLD pump chamber RPC-80-1 made of PE is equipped with a high quality effluent pump and promotes domestic wastewater via a pressure line to the sewage system, even at distances of many kilometres.

- + Pump chamber directly from the manufacturer
 - + Planned individually
 - + Carried out economically
 - + Environmentally friendly and durable
 - + Cost-effective operation
 - + Maximum operational safety
 - + High-quality parts
 - + Easy installation and maintenance
 - + Low purchase price
 - + Low crop damage on your property
- = **ROMOLD Pump Station RPC-80-1**

THE CHAMBER

ROMOLD polyethylene pump chamber RPC 80-1 for holding a submersible pump. Made of 100% virgin material, without recycling content. One-piece construction for absolute water tightness.

ROMOLD plastic chambers are corrosion resistant, environmentally friendly and have a lifetime of at least 100 years.

THE PUMP

The submersible sewage pumps of the ROM Eco-CAP series are specially designed to promote domestic sewage with excrements. The pump features a self-cleaning and non-blocking hydraulics, is reliable and has a long service life.

THE CONTROL PANEL

Single-pump standard control ROM-Control-104 with LCD plain text display for switching the pump on and off irrespective of the water level.

Available with outdoor column or wall installation in the basement.

The integrated level-control through the air bell allows automatic switching on and off of the pump.

ACCESSOIRES

Plastic bearing ring for holding a commercial cover.

EVERYTHING FROM A SINGLE-SOURCE

Complete solution for your low cost sewage disposal.
